AUTONOMOUS AGENTIC PIPELINE

VIRALFLOW AI

Self-Improving Multi-Agent Content Engine for Short-Form Video Creation

Automatically transforms live web and social trends into fully-rendered, fact-checked 9:16 vertical short-form videos for TikTok, YouTube Shorts, and Instagram Reels.

Live App: https://my-viralflow-ai.vercel.app | GitHub: Ibrahim2637/ViralFlow.Ai

THE PROBLEM: SHORT-FORM CONTENT BOTTLENECK

4-6 Hours Spent Per Video

Creators and marketers waste hours daily researching trending topics, drafting scripts, and editing short-form timeline cuts.

AI Hallucination and Risk

Generic AI script tools output unverified numbers, fake guarantees, and high-risk claims that ruin brand reputation.

Creator Burnout

Maintaining daily 9:16 vertical video output across TikTok, Shorts, and Reels is exhausting, causing content drop-off.

THE SOLUTION: VIRALFLOW AI

Creator DNA Engine

Learns audience demographics, creator tone, vocabulary, and proven hook patterns for strict brand voice alignment.

Factual Guardrail Queue

Audits every generated claim for numerical accuracy and time-sensitivity before video compilation.

9:16 Vertical Video Renderer

Combines ElevenLabs AI voiceover, Pexels portrait B-roll, and Shotstack MP4 video compilation automatically.

TECHNICAL ARCHITECTURE AND AGENT PIPELINE

1. Frontend and Studio: Next.js 16 (Turbopack, App Router), TypeScript, Tailwind CSS, HTML5 9:16 Video Player

2. Multi-Agent Engine: Google Gemini 3.6 Flash and OpenRouter (GPT-4o-mini) for trend scoring, script writing, and fact checking

3. n8n Orchestration: 18-node n8n workflow (viralflow-generate webhook) for background trend ingestion and agent dispatch

4. Voice and Render Pipeline: ElevenLabs Speech Synthesis + Pexels Portrait B-roll Search + Shotstack 9:16 MP4 Video Render

CORE FEATURES AND DEMO WORKFLOW

Trend Radar

Scans live YouTube and Tavily web queries, scoring opportunity vectors based on momentum and audience fit.

Strategy Lab

Synthesizes strategic hook variations tailored to creator hook patterns.

Script Studio

Interactive scene-by-scene script editor, visual prompt controls, and fact-checking queue.

Approval and Publishing

Live 9:16 vertical video playback preview with automated publishing rules.

TARGET AUDIENCE AND MONETIZATION

Free Tier
$0 / month

- 3 AI video drafts/week
- Basic Trend Radar
- Standard Script Editor

Pro Creator
$29 / month

- Unlimited Trend Scanning
- n8n Webhook Integration
- Custom Voice Cloning
- High Priority Rendering

Agency Enterprise
$99 / month

- Multi-Creator DNA Profiles
- Auto-Publishing Queue
- Dedicated n8n Server Setup
- Team Permissions

READY TO DEMO AND PRESENT

ViralFlow AI turns live web trends into ready-to-publish short-form videos automatically.
